Product Discontinuance Notice

End-of-Life (EOL) Announcement: March 1, 2018

SCT is dedicated to providing the best solutions for today's market and technology requirements. To most efficiently manage our product offerings, SCT is discontinuing the following product(s) in accordance with our EOL policy. We appreciate your continued support.

Discontinued Product(s):

RC2-Director
RC2-Director-K
RC2-Director-S
RC2-Director-KS

Replacement/Alternative Product(s):

Please see the RC2-HDP Extension Kit as an alternative kit. Note that the RC2-HDP solution will require the use of the Polycom power supply that ships with the Director, which will need to be installed local to the Director. The Integrator will also need to establish an audio connection back to the codec, separate from the RC2-HDP Extension Kit.

End-of-Sale Date:

Our anticipated date that stock will be depleted is August 1, 2018. If placing an order after this date, please call to check availability. All future orders will be booked on a non-cancelable/non-returnable basis. Exact End-of-Sale dates are based upon product availability and determined solely at the discretion of SCT. To help insure product availability, SCT strongly recommends placement of last time buy orders for these product(s).

Warranty & Technical Support:

The terms and conditions in effect at the time of purchase of the discontinued products are not modified by this PDN.

For the latest status and any additional questions regarding this PDN, please contact your SCT sales representative.
