Sound Control Technologies

Thank you for purchasing our recently revised **RCM™ Spring Clip Camera Mount** featuring a spring clip for easier installation!

• The spring clip is attached to the back plate using the provided black 8-32 x 1/4" phillips pan head machine screw.

• Attach the camera shelf to the two studs at the bottom of the wall plate using the [2] cap nuts and lock washers.

• Secure the wall plate to a standard double gang electrical box using the [4] black 6-23 x 3/4" phillips oval head screws.

• Secure your camera to the camera shelf using the provided thumb screws (1 or 4 depending on camera mount model).

Please Note: If using a low voltage trim ring, please hold the camera module securely with two hands when inserting it into the spring clip to prevent it from dropping into the wall!

RemoteCam™ Camera End module mounted in the spring clip.

Model #:	Supporting:
RCM-CP6™	Cisco Precision 60 Camera
RCM-EE4™	Polycom EagleEye IV
