Important: Due to the power demands of Poly's Director II, it is best practice to utilize SCT's provided RC-RKM™ rack shelf to facilitate ventilation.

SCTLink™ Cable Specs
Integrator-Supplied CAT5e/CAT6 STP/UTP Cable T568A or T568B (10m-100m min/max Length)

SCTLink™ Cable
Power, Control, Audio & Video
The SCTLink™ cable must always be a single, point-to-point CAT cable with no couplers or interconnections.

WPS-48 48VDC
100-240V-47-63Hz
Power Supply

Optional 3rd Party Audio Input

Optional 3rd Party Audio Output
(Please Note: Not a Loop Out)

Poly Supplied
Audio Cable #2457-69476-001
3.5mm Adapter #1517-09350-001

RC7-PD2™ Application Guide

Module Dimensions
RC7-CE™: H: 1.6” (40mm) x W: 6.48” (164mm) x D: 4.55” (115mm)
RC7-HE™: H: 1.6” (40mm) x W: 8.65” (219mm) x D: 4.55” (115mm)

RCC-C030-0.4M
Mini-HDCI Y Cable to RJ45/HDMI

RCC-C016-0.3M
Audio Cable (Far-end reference for auto-tracking)

PPC-015-0.4M
Power Cable
TEST YOUR SCTLink™ CABLE

We highly recommend using an Ethernet Network Tester/Analyzer alongside our provided PowerSniffer to confirm your SCTLink™ wiring. Our PowerSniffer only tests conductor continuity and will not identify data integrity or capacity issues.

1. Test and verify your CAT5e/CAT6 STP or UTP SCTLink™ cable for T568A or T568B. The SCTLink™ cable must be between 10m (minimum) and 100m (maximum) length.
2. Connect one end of the SCTLink™ cable to the “SCTLink™” connection on the Head End module.
3. Connect the other end of your SCTLink™ cable to the provided PowerSniffer.
4. Connect the WPS-48 power supply to the Head End module.
5. Connect the WPS-48 power supply to AC mains.
6. If the SCTLink™ cable is properly terminated, it will display eight GREEN LEDs. If you get any other result, stop and re-terminate cable.
7. Once your SCTLink™ cable has been tested, please disconnect the WPS-48 power supply from the RC7-HE module, and the PowerSniffer from the SCTLink™ cable, before proceeding to install.

INSTALLED THE EXTENSION KIT

Before integrating your RC7-PD2™ extension kit, please ensure your Poly EagleEye Director II base is connected to your two EagleEyeIV cameras (Power and Ethernet connections) via Poly’s instructions.

Connect the camera-end cables:

1. Connect the RCC-C030 mini-HDCI end to the mini-HDCI input on the EagleEye Director II base.
   • Connect the RCC-C030 HDMI leg cable to the RC7-CE’s HDMI “HDMI In” port.
   • Connect the RJ45 leg cable to the RC7-CE’s “Power Serial/IR” port.
2. Connect the RCC-C016 1’ Audio Cable between the RC7-CE “Line Out” port and the EagleEye Director II’s audio TRS input.
3. Connect the PPC-015 Power Cable between the EagleEye Director II’s power input and the RC7-CE’s power input, labeled “+12VDC Output”.
4. Connect the RCC-H030’s HDCI end to the primary HDCI input on the Group Series codec.
   • Connect the HDMI leg cable to the RC7-HE’s HDMI “Output 1” port.
   • Connect the 9Pin leg cable to the RC7-HE’s port labeled ‘Serial/IR’.
5. Connect the Polycom supplied audio cable between the RC7-HE’s “Line In” port and the Group Series Codec’s audio outputs.

Connect and Initiate the Extended System:

6. Connect one end of your CAT6 SCTLink™ cable to the RC7-HE module’s “SCTLink™” port. Connect the other end to the RC7-CE module’s “SCTLink™” port.
7. Connect the WPS-48 Power Supply to the RC7-HE.

• ALLOW UP TO TWO MINUTES FOR THE EAGLEEYE DIRECTOR II SYSTEM TO INITIALIZE •

Power Supply Specifications (AC-Mains Side): Input Voltage: 100VAC to 240VAC 47Hz to 63Hz. Efficiency: 85% minimum. Turn-on Surge: Less than 60 amperes for a duration less than 1mS. Power Factor: 0.9 minimum (where applicable). 48VDC power supply uses 2.80 amperes AC maximum. All specifications subject to change without notice.
